ADVERTISEMENT.

THIS Map was drawn from an original Survey, on a Scale of *Two Inches* to a *Statute Mile*, by Mr. Thomas Barnard: It was reduced for Me at MADRASS in 1776 by B. Henry to the present Scale of $\frac{1}{2}$ of an *Inch* to a *Statute Mile*. The Map extends *Sixty Miles* to the *Southward*, and *Forty-nine* to the *Northward* of FORT ST. GEORGE. As the Map would have become unintelligible by inserting all the Names of Places, it appeared most expedient to insert only some of the principal or most remarkable Places at *length*, and to express the others by Letters of Reference. The Margin at Top and Bottom is marked with the *Miles* to the *Northward* or *Southward* of FORT ST. GEORGE; to the *Right Hand*, marked N, being to the *Northward*, to the *Left*, marked S, being to the *Southward*: The Margin at the Two Ends being marked with the *Miles* to the *Eastward* and *Westward* of FORT ST. GEORGE. The Name of any Place is immediately found in the EXPLANATION by observing at what Distance North or South and East or West the *Letter of Reference* stands. For the more readily determining the Place of Intersection, there is a Scale marked on that Part of the small Plate which is to be cut off when the Two Plates are united, when the Scale is cut off and applied to the Top and Bottom Margins, the Divisions marked on the Scale are conformable to those on the End Margin of the Map.

Soho-Square,
April 15, 1778.

Alexander Dalrymple.
